Dropped Objects Prevention Tool Tethering

Description

Dropped tools are a major cause of workplace injury and even fatalities when working at height.

CableSafe provides a complete solution for stopping tools and objects from being dropped when working at height. CableSafe Dropped Objects Prevention Tool Tethering is independently tested, fail safe and innovative equipment.

Create a safe work environment with tethered tools in just three simple steps.

Step 1: Tool Tethering

Establish a certified tether point on your tool. We have two different options in our standard product range. Other options available upon request.

- > CableSafe adhesive heat shrink loop with polyester webbing tether with stainless steel d-ring.

Available in two different sizes:

- 24 x 50mm (tools up to 1kg)
- 50 x 50mm (tools up to 2.5kg)

- > CableSafe 270mm polyester webbing tether with stainless steel d-ring and lockable self choke toggle tether.

Step 2: Tool Belts and Tool Holders

Select your certified belt / bag

- > CableSafe 270mm polyester webbing tether with stainless steel d-ring and lockable self choke toggle tether.

- > CableSafe heavy duty tool bucket bag with lifting rope and scaffold hook and internal lockable, captive stainless steel screwgate carabiners rated to 34kg.

Dropped Objects Prevention Tool Tethering

Step 3: Tool Lanyards

Select your certified lanyard

- > CableSafe 2m heavy duty TPU coil lanyard with stainless steel swivel captive lockable carabiners.

- > CableSafe 1.5m stainless steel wire complete with stainless steel captive, lockable carabiner both ends.
